

CONTRACT ASSEMBLY

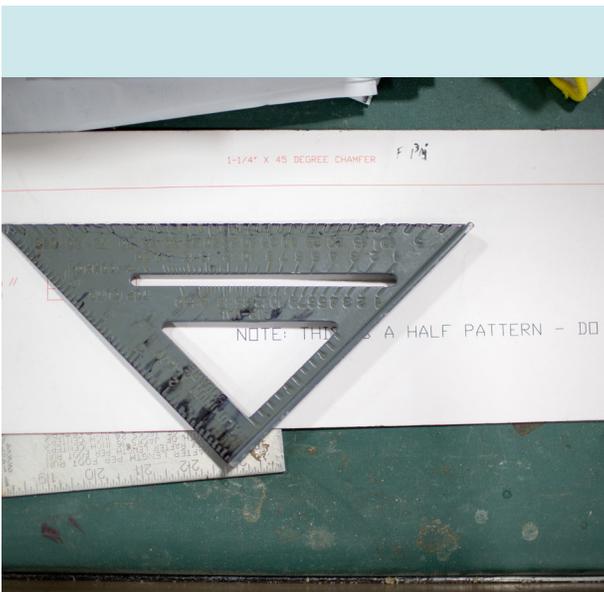

PUT IT ALL TOGETHER

Design. Prototyping. Assembly. Shipping. Quality. We are a product-complete OEM provider that gets your ideas to market faster at a lower development cost. Our quality standards are those required of a Tier 1 automotive supplier, ensuring your concepts emerge in the highest quality.

LEAVE THE DIRTY WORK TO US

You focus on selling the product. We'll focus on delivering the right product in the right place at the right time. The combination of dedicated employees and a seamless lean-manufacturing process leads to reliable, cost-effective results. Add program management, supply chain and logistic support, and you're going to like the look of your bottom line.

Design Development

It starts as an idea. It becomes a firm concept. Then, it becomes real. Working with your engineers and designers, we have the expertise in materials, production techniques and lean manufacturing to generate prototypes quickly and add support where needed.

Technical Aptitude

Highly skilled technical employees piece everything together into your finished product. Our team of experts in cutting, sewing, upholstering and assembling, including water-based gluing processes, have experience in fabric, vinyl, leather, fire-retardant materials and any number of other customer materials.

OUR PROCESS:

When looking to launch, you want speed, reliability and accuracy. That's exactly what our proven process achieves. We work in concert with your team from the initial quote through order fulfillment and everything in between.

We source all necessary components from domestic and international partners.

Using water-based glue minimizes our environmental impact.

State-of-the-art, computerized pattern cutting ensures precision and consistency from our team of experienced sewers.

Complete product assembly is reliable, accurate and cost-effective.

Final preparations for delivery include quality inspection, packaging, labeling and shipping directly to customers.
